If you want to make a demontration and split it in different steps you can use the command

`\step`

Demontração 1 *Super demonstration*

For example:

Passo 1: First we must have an equation

$$f(x) = 0$$

Passo 2: Then we can set a value to our x

$$x = 1$$

Passo 3: Finally in our last step we calculate the result

$$f(1) = 0$$

demostração

Demontração 2 *Second Super demonstration demostração*

For example:

Passo 1: First we must have an equation

$$f(x) = 0$$
